About

I have extensive experience in the field of software development and practices. I have helped teams and companies to achieve success and worked at both smaller starts, my own startups and larger enterprises.

For the last years I have been utilizing AI (LLMs) to great extend and have gained a depth of experience and insight into the capabilities and utilization of these tools. I'm very excited about the possibilities that exists and what is yet to come and will utilize this to help my employer and customers on their journeys to success.

Experience

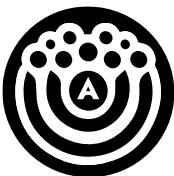

Founder and CEO

Nostr, www.nostr.app

2025-Current

Founded Nostr startup to develop a modern Nostr client and Nostr infrastructure platform.

Nostr has a proven track record, yet the user adoption is stagnating. Nostr was founded to help Nostr scale globally, by providing both a modern new app that utilizes scaling practices and providing globally deployed infrastructure for users.

Founder, CEO and Chief Product Engineer

Ariton, ariton.app

2024-2025

Founded Ariton startup to develop a Community Super App. The App was public accessible in pre-beta stage and almost feature complete. The app was built on Web 5 technology which was being developed simultaneously by a separate entity, which ended its development. Ariton is currently in hibernation for this reason.

Principal Engineer (Senior Software Architect until 2023)

Å Energi (formerly Agder Energi), Kristiansand, Norway

2018 – 2024

Worked as part of the Developer Experience (DevEx) team at Å Energi, responsible for supporting their software developers locally and international in Scandinavia and Europe.

Arranging developer conference, managing courses and training, giving developer support, DevOps and more.

Earlier I was working as a lead architect and developer coach, responsible for cloud policy and architecture.

Å Energi is a company that does everything related to production of electric energy, from planning, production, distribution and market. Worked with a lot of varied technologies and people.

Technologies: Angular (TypeScript), .NET Core, Azure Cloud Services, Azure IoT, PowerBI, machine learning, custom dashboards, Azure API Management, Azure Active Directory, MongoDB, CosmosDB, Azure DevOps and lots more.

Chief Architect

Effer, Kristiansand, Norway

2011 – 2018

Designed and developed a solution that tracks personnel and equipment in dangerous situations and areas. Built on microservices architecture using Azure Service Fabric and offline mobile app using Cordova and Angular.

Also did various consulting works while working at Effer.

Technologies: .NET Core, Angular, Azure Service Fabric, Azure Cloud Services.

Senior Solution Architect

Steria, Oslo, Norway

2009 – 2011

Worked on various customer projects as a consultant, including some of the largest institutions in Norway, including the military and the largest bank in Norway.

Technologies: SharePoint, Microsoft .NET, WPF, WCF, APIs, Web Apps, Windows Forms.

Technology Leader

Capgemini, Oslo, Norway

2007 – 2009

Had a position as technology leader for the Microsoft department of Capgemini in Norway. Did work on various consulting projects, including some of the largest institutions in Norway.

Technologies: BizTalk, Microsoft .NET, .NET rule engine, SharePoint, APIs.

Senior Solution Architect

Kongsberg Intellifield, Kristiansand, Norway

2006 – 2007

Was product manager for a suite of visualization products that shows current and historical status on oil drilling operations.

Technologies: Microsoft.NET, WCF and Windows Forms.

Architect and Developer

Digimaker, Kristiansand, Norway

2003 – 2006

Worked on in-house CMS product named Digimaker, worked on customer projects for Financial Times, Mercedes Benz and more.

Technologies: Microsoft.NET, SQL Server, web app, JavaScript, CSS.

Founder, Architect and Developer

Brain Software, Kristiansand/Grimstad, Norway

2001 – 2003

Own startup with two others, building a software delivery platform built on Microsoft.NET and Windows Forms. Built licensing system and automated update and distribution system. Also did consulting for various customers.

Technologies: Microsoft .NET (beta), SQL Server, Windows Forms, Flash.

Web Developer

Nesthood, Kristiansand, Norway

1999 – 2001

Worked as a web developer on various customer projects, including some fairly advanced DHTML (Dynamic HTML) projects.

Technologies: Modern web technologies, JavaScript, Active Server Pages.

Web Designer and Developer

Interweb, Kristiansand, Norway

1998 – 1999

Worked as web designer and developer, webmaster for a few different customers. Did a lot of work in Macromedia Flash.

Technologies: Photoshop, HTML, CSS, JavaScript, Flash.

Web Designer

Web Byrået Norge, Kristiansand, Norway

1998

My first job where I worked as web designer.

Technologies: Photoshop, HTML, CSS.

Education I have no relevant education from school (started working when I was 17), but I have taken many courses and exams throughout my career, especially focused on Microsoft technologies. This also includes recently the Machine Learning training from Microsoft.

Communication I have throughout my career performed a lot of public speaking at various conferences. I love to contribute to the community. Speaks fluent English and Norwegian.

Leadership I have a set of deep skills and experience that often makes me sought after for expertise and leadership on technical issues and topics.

I have completed a year of leadership program in 2020.

Technology While I have a broad set of experience, my primary technology focus and skills the recent years has been on:

- GitHub Copilot, OpenCode, AI, LLMs.
- Angular
- TypeScript/JavaScript
- HTML/CSS
- Progressive Web Apps
- DID/Verifiable Credentials
- .NET
- DevOps (GitHub and Azure DevOps)
- REST APIs
- Electron/Tauri/Cordova (web-based desktop and mobile apps)
- Microsoft Azure (management, ARM and Bicep)
